

STATE OF CALIFORNIA  
STATE WATER RESOURCES CONTROL BOARD  
**DIVISION OF WATER RIGHTS**

**ORDER**

APPLICATION 13351

PERMIT 8018

LICENSE 4946

ORDER CORRECTING SOURCE,  
POINT OF DIVERSION AND  
AMENDING THE LICENSE

**WHEREAS:**

1. License 4946 was issued to Hiram H. Hendren and Beatrice I. Hendren on December 31, 1957 pursuant to Application 13351 and was filed with the Nevada County Recorder on January 2, 1958.
2. License 4946 was subsequently assigned to Julie A. Chenu and Andrea H. Fiske.
3. A review of the project area under License 4946 was conducted by the State Water Resources Control Board (State Water Board) staff on June 20, 1992. Staff recommended that the description for the source and point of diversion should be corrected to correspond to the actual source and location of the point of diversion within Section 12, T17N, R15E, MDB&M.
4. The State Water Board has determined that said corrections do not constitute the initiation of a new right nor operate to the injury of any other lawful user of water and that sufficient cause has been shown for said corrections.
5. The Nevada County Recorder should be notified of the corrective action.
6. The license condition pertaining to the State Water Board's continuing authority should be replaced with the current version to conform with Section 780, Title 23 of the California Code of Regulations.

**NOW, THEREFORE, IT IS ORDERED THAT:**

1. The description for the source under this license be corrected to read:

Unnamed spring tributary to Donner Lake.

2. The description for the Point of Diversion under this license be corrected to read:

North 250 feet and West 1,200 feet from the SE corner of Section 12, T17N, R15E, MDB&M, being within the SE $\frac{1}{4}$  of SE $\frac{1}{4}$  of said Section. Also, described as California Coordinates, Zone 2, N 610,500 and E 2,492,950.

3. The license condition pertaining to the State Water Board's authority to read:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.
